

The Davall Group comprises three outstanding companies. Each Company specialises in its own area of expertise, yet compliments the work of the other two to provide the complete 'Transmission Service'.

Davall Gears is an established leader in the field of custom-made gearing, a position attained by successfully combining extensive knowledge of the industry with modern technology. The company is able to provide design and manufacturing solutions to the many and varied power transmission and rotary motion problems posed by their clients.

CTP Davall Ltd is one of the few companies that specialises in the design and manufacture of both high precision injection moulding gears and complete transmission systems in 'engineering plastics'. An in-depth knowledge of engineering plastics, and extremely high standard of equipment and the efficiency of its production control and quality procedures have won this company much acclaim.

Davall Stock Gears provides the designer, prototype maker, distributor, maintenance engineer, model engineer and original equipment manufacturer with a reliable source of standard off-the-shelf gears, toothed belt drives, gearbox, couplings, universal joints and other transmission components. More than 10,000 different items are carried in stock, offering a comprehensive range, an unrivalled service is given to customers.

**These companies ensure that the Davall name is
synonymous with
QUALITY.**

Group Quality approvals include:

- M.O.D. AQAP-1
(Def. Stan 05-21)
- BS 5750 - Part 1
